

Ivette Serrano  
Eighth Grade Student

After-School All-Stars @ Walden has many opportunities for students. It helps students to achieve some goals whether educationally or mentally. Many students say and have a great time. Students also have time to talk to their friends.

The best part of the program is the wonderful field trips. Everyone has a lot of fun, including the teachers. On one of our field trips, we went skating. We all got the opportunity to skate even if some of us fell to the ground. We all skated, listened to music and had fun. We really enjoyed ourselves.

We also receive assistance with our homework everyday after school. We eat a snack and then complete our assigned homework. Teachers explain the assignment until we get it. It is also like a tutorial because you get one-on-one help. That is great!

I also enjoy After-School All-Stars @ Walden because there are many interest groups. Some of them are cheerleading/dance, chess, debate, touch football and yearbook. Currently, I am on the debate team. I love it especially when I win. When I win, it proves that I am becoming a better debater. Debate will provide me with opportunities in life that other activities will not.

After-School All-Stars @ Walden provides students will better chances to achieve their dream careers. It also helps students achieve in school by understanding their work better. Many students like the program.
