

*** What The After School Program Means To Me***

It means I'm getting extra attention for my needs in school. If I'm having a problem like with math Ms. Guy is going to have someone who's well educated in that field to help me set a better understanding in how to do math, and teach me things so that when the up coming CRCT arrives I want be lost or even worse held back.

It's whole purpose is to help the student exceed in the field of not only math, but Social Studies, Language Arts, and Science also. Teachers go out of their way to assist students with more advantages to having a successful future which many of my fellow peers choose not to use this option and many lose out because these are the same students with bad grades. I am striving to do better for myself. Plus we also get to enjoy ourselves with treats and interesting field trips.
