Dance

Our dance program is led by Ms. Beth Bolden. Ms. Bolden's experience stretches from contemporary to jazz, and ballet. The students who are exposed to this program are able to embrace a variety of techniques. This past semester students were rewarded with the opportunity to be lead in cultural dance workshops provided by Young Audiences & The Woodruff Arts Center of Atlanta.

Math Intervention

The Math Intervention Program gives students an opportunity to obtain additional help in an effort to increase test scores. This program allows students to perform alternative assignments and gradually introduces more components of the regular assignments as they improve at their own pace.

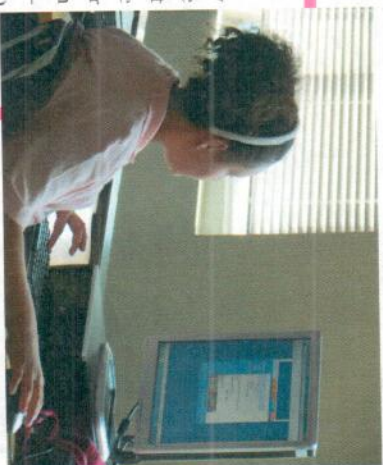

Fashion & Design

Our Fashion & Design Program exposes participants to the latest trends and skills needed to acquire a career in the fashion industry. The students are able to express their style using online tools and functions that bring out their individual creativity. Since the beginning of the course, students have created their own fashion logos, designed their own clothing lines, and have incorporated the use of different fabrics in their designs.

iMovie (Technology)

This program exposes our girls to technology professions as career goals, as well as plants the seeds of engineering. Participants produce a project in a new technical area every week and gain valuable skills that open a world of opportunities for their futures. The Fall 2012 class have covered web design and programming with Power Point, Mac Programing, animation and app development will soon to

Girls In Pearls Mentoring on Fridays

Fridays are a special time for our After-School All-Stars Participants! As a part of our program we have incorporated a mentoring component in an effort to establish positive relationships with our girls.
