Dear Dr. Thompson:

After-School All-Stars @ Walden is a wonderful program. The program provides students with much needed tutorial services. It also allows us to explore things outside of the school via field trips. Lastly, we are provided with fun things to do in weekly interest groups. Therefore, ASAS @ Walden is exciting and appreciated.

The tutorial services provided are very helpful for students throughout their educational experience. It allows us to get help in any subject needed. Teachers and Georgia State University students allow us to address subjects that were not explained enough during the daily class period. We can also work on school projects in the media center. Once you stay in school so long your mind may wander. This program allows us to catch up on what we may miss in class.

ASAS @ Walden also takes students on numerous field trips. We will take at least two trips to the skating rink. This trip is a lot of fun. We also went to the Apex Museum and that was very educational. We will be going to Golden Corral this Friday because of our exceptional behavior.

The interest groups of ASAS @ Walden are also great! My favorite is cheerleading and dance. This interest group provides us with sportsmanship practice and leadership. Cheerleading is a fun sport too.

ASAS @ Walden is very beneficial. You can receive tutoring. The field trips are used as rewards and they are wonderful. Along with all of this, they have interest groups that are amazing. Therefore, ASAS @ Walden is a great program. I hope we have this program next year.

Yours truly,

Reneatha Eldridge
